

THE TOTAL SOLUTION FOR HOLDCLEANING

HOLDCLEANING

Efficient Hold cleaning increases flexibility & earnings and reduces costs, off hire and cargo claims. Hold cleaning requires adequate pre-planning, efficient cleaning chemicals and innovative cleaning equipment to get the job done.

CLEANING CHEMICALS

The use of specialized cleaning chemicals, barrier coatings and quality equipment will greatly contribute to the process of thorough and effective cleaning of your holds therefor aiding in decreasing port turnaround times, costs and earnings. Our chemicals, innovative barrier coatings and hold cleaning kits have been carefully selected and tested together with our clients and partners to meet the highest quality standards and will perform even under the most difficult circumstances.

SERVICES

Marine Care provides expert advice, efficient procedures and supercargoes. We can assist with pre-planning, advise or full onboard cleaning operation including workers and cherry pickers at designated ports.
