

CARECLEAN HIGH PRESSURE

Alkaline cleaning agent for use in high pressure and steam cleaners

DESCRIPTION

Careclean High Pressure is a liquid blend of surfactants and hardness stabilizers, for cleaning of all type greasy deposits.

Careclean High Pressure is especially developed for the use in high pressure cleaners and steam cleaners, even running on shore water.

ADVANTAGE

- Suitable for removal of a large range of oil and grease
- Non flammable
- economical in use
- Suitable for use on synthetic material, rubber, most metals and hardened coatings

APPLICATIONS

Careclean High Pressure is mainly used for general cleaning of engine spaces, decks, deckhouses, cargo holds and tanks.

DIRECTIONS FOR USE

For use in high pressure cleaners generally use a 10 % solution of Careclean High Pressure mixed with water in a dosing tank (pre-washing a 5 % solution) is sufficient. Adjust the dosage in such way that at the spray nozzle of the high pressure machine a 0,1 – 0,5 % solution is reached. Recommended cleaning temperature is 20 to 80 °C. With persistent fouling it is recommended to spray the product pure or diluted with water to a 10 % solution on the contaminated object. After a soaking time of 5 – 10 minutes spray clean with a waterjet.

Careclean High Pressure, undiluted, is less suitable for use on aluminum, tin, zinc, galvanized material and on zinc silicate coatings.

- Eco-friendly
- Biodegradable
- Non Toxic
- Water based
- Economical

DOSAGE

Spraying	0,1 - 2 % solution in water
General Cleaning	0,5 - 10 % solution in water

PROPERTIES

Article number	14704
pH (1 % solution)	11,6 - 12,1
Density	1,1 g/cm ³
Flashpoint	None
Physical state	Liquid

APPROVALS

Marinfloc Approved OWS Compatible

For detailed information on safety and health, please refer to the Material Safety Data Sheet MSDS and/or product label.
